

**REMARKS**

The applicants note with appreciation that the examiner indicates that all claims are allowable. However, the examiner asserts that the originally filed specification does not provide any support for the computer readable medium to store a computer program for calculating a radiated sensitivity of a mobile terminal claimed in claims 17 – 28. Page 4, lines 14 – 16 in the instant specification state that the test electronics “include all electronics, program instructions, memory, etc., for configuring the test setup, generating test signals, and processing test data.” Thus, the specification does support claims 17 – 28. However, to facilitate issuance of the pending application, please amend the specification to add the paragraph regarding the computer readable medium shown in the enclosed amendments.

If any issues remain, the applicants respectfully request that the examiner call the undersigned so that any such issues may be addressed expeditiously.

Respectfully submitted,

COATS & BENNETT, P.L.L.C.
